Efficient, fast and powerful performance with Snapdragon® 680 chipset

Redmi 10C is equipped with a Snapdragon® 680 processor built on flagship-level 6nm process, offering a max clock speed up to 2.4GHz to deliver efficient and powerful performance while conserving power. Thanks to the UFS 2.2 storage, Redmi 10C brings faster writing speed, which means faster installation and loading of all your favorite applications.

High-res photography with 50MP main camera

Redmi 10C comes with a 50MP high-resolution main camera for taking crisp photos and videos, as well as a 2MP depth camera that helps to achieve a natural blur effect in the background when you take portraits. The device also comes with Night Mode to illuminate your photos with more details in low-light conditions, as well as Movie Frame to create a cinematic effect for your photos.

Immersive entertainment on a large screen

Redmi 10C features a large 6.71" Dot Drop display, offering an immersive viewing experience for your daily entertainment. Redmi 10C also supports Widevine L1 HD streaming, capable of streaming HD videos from Netflix or Amazon Prime Video, so you can enjoy watching your favourite movies and shows. Redmi 10C also comes with a powerful loud speaker and 3.5mm headphone jack to complete your audio visual experience.

Long-lasting battery with 18W fast charging

Equipped with a long-lasting 5,000mAh battery, Redmi 10C provides enough power to last you through the day, letting you spend more time playing and less time charging with support of up to 18W fast charging.*

** Redmi 10C comes with a 10W in-box charger, 18W charger is sold in separate.*
*** NFC availability may vary by market*
